

FILLER WEIGHTS

HOW THEY WORK

Lift Solutions provides sturdy and reliable steel filler weights for traction elevator systems. We also provide lead, cast and special fill elevator filler weights. We are able to methodically cut and size the steel to fit any counterweight frame. Our domestically produced, low cost, high density, value added elevator filler weights are fabricated from low carbon commercial steel.

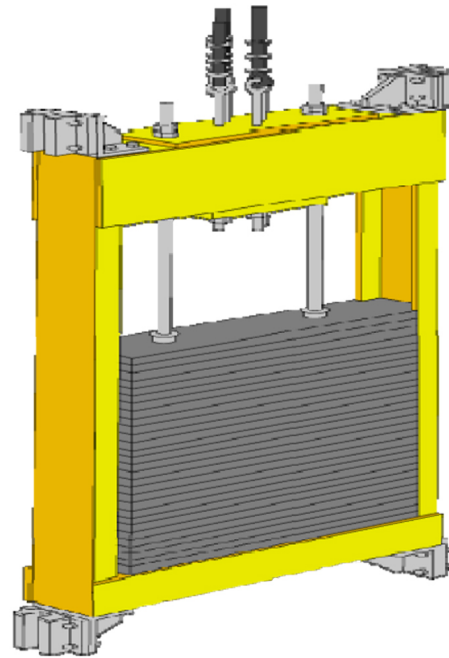

CUSTOM SIZES & STAGED DELIVERIES

We can methodically cut and size the steel to fit any counterweight frame. *Our elevator filler weights can be cut to any dimension to precisely fit the frame.*

We specialize in fabricating elevator filler weights from 1/2" to 10" thick. *Our value added services include any fabrication and finishing, including flame cutting, welding and painting.* The 200,000 sq. ft. facility houses multiple docks, several cranes and state-of-the-art equipment to quickly cut your filler weights and ship them out.

ADVANTAGES

- State-of-the-Art Facility
- Large Inventory
